HOW TO READ THE TABLES

Our comprehensive tables of analysts recommendations and earnings estimates for approximately 1,000 Canadian companies appear in every other edition of Investor's Digest. They allow you to compare current estimates for net earnings per share, cash flow per share for oil and gas stocks and distributions per unit for income trusts in this fiscal year and the next.

The tables include the company name, stock symbol, date of the next fiscal year-end and the number of analysts covering that stock. Analysts use a wide variety of terms to define their recommendations. We have simplified these into specific, easy-to-follow categories — buy, buy/hold, hold/sell or sell. (The number of analysts surveyed may be greater than the number of recommendations because some analysts may provide earnings estimates without a specific recommendation.)

Latest EPS shows what the company actually reported for its last fiscal year-end, with adjustments for splits and consolidations. Current Year and Next Year show the analysts' estimated earnings for this fiscal year and the next. These consensus estimates are the average of all estimates from the analysts surveyed.

Earnings per share, cash flow per share and distribution per unit play vital roles in fundamental analysis. A high earnings per share prediction means dividends may increase or, at least, continue, while a negative or declining one shows management may be hard pressed to continue paying dividends.

BUY, SELL, HOLD ADVICE — PLUS EARNINGS ESTIMATES
FOR APPROXIMATELY 1,000 CANADIAN COMPANIESBUY, SELL, HOLD ADVICE — PLUS EARNINGS ESTIMATES
FOR APPROXIMATELY 1,000 CANADIAN COMPANIES
